

CONFIDENTIAL COMPUTING SUMMIT™ 2026

hosted by

June 23-24, 2026 | San Francisco, The Mint

2026 SPONSORSHIP PROSPECTUS

About Confidential Computing Summit

June 23–24, 2026 | San Francisco, The Mint

The Confidential Computing Summit 2026 enters its fourth year as the leading global forum dedicated to the technologies that provide verifiable privacy and governance. Taking place June 23–24, 2026 in San Francisco, CC Summit 2026 is a highly curated, two-day experience designed to accelerate real-world adoption of confidential computing and Confidential AI.

A New Approach for 2026

In 2026, CC Summit continues to evolve to deliver a high-impact, thoughtfully curated experience. Hosted at The Mint in San Francisco, this year's event will bring together 400+ in-person attendees, including a strong concentration of ideal customer prospects and decision-makers.

Designed to foster meaningful conversations and real business connections, the Summit combines an energizing in-person experience with live streaming and on-demand content to extend reach beyond the room. The result: broad visibility paired with the kind of high-quality engagement sponsors consistently tell us drives the most value.

The Customer-First Summit

CC Summit 2026 puts buyers and end customers at the center of the conversation. This is the preeminent event that brings together the complete value chain in a highly curated community: hardware vendors, cloud providers, software vendors, service providers, data privacy experts, security experts, developers, regulators, and researchers alongside technical decision-makers, enterprise architects, and business leaders who are evaluating and deploying confidential computing and Confidential AI solutions.

Attendees span industries where trust, privacy, and security are mission-critical, including financial services, insurance, government and defense, healthcare, life sciences, technology, and sovereign cloud environments.

The ultimate goal of CC Summit is to unite a broad set of customers: technical decision-makers, architects, and industry leaders to showcase real-world use cases, customer stories, practical demos, and hands-on solutions that solve critical challenges, demonstrating how Confidential AI unlocks new business value through the power of verifiable trust.

The Confidential Computing Summit 7 Core Objectives

For 2026, the Summit sharpens its objectives around customer value, verifiable trust, and ecosystem alignment.

- **Unite the end-to-end ecosystem around buyers**
Bring together hardware, cloud, software, and service providers with regulators, and OEMs—anchored around enterprise buyers and their real-world requirements.
- **Build a trusted and focused community of practitioners and leaders**
Foster meaningful connections among executives, architects, engineers, and industry leaders through deep, high-quality conversations and networking.
- **Showcase real-world deployments and use cases**
Highlight customer stories, sector-specific panels, and practical demos that show how confidential technologies are being used today to unlock new use cases.
- **Clarify capabilities and trade-offs**
Cut through hype by clearly explaining what Confidential Computing and Confidential AI can—and cannot—solve, including emerging threat vectors beyond the cloud.
- **Demonstrate Practical Solutions Across the Stack**
Educate attendees on deployable solutions available now and in the near future, spanning hardware, cloud platforms, software frameworks, and complementary tooling.
- **Elevate awareness with mainstream and beyond with key opinion formers**
Use top tier media, industry analysts, regulators, and standards bodies to take the conversation beyond the “confidential computing bubble” and into broader AI, security, and business audiences.
- **Foster long-tail engagement beyond the two days**
Extend impact via live streaming, on-demand keynotes and breakouts, and post summit webinars that continue the conversation and expand global reach.

The Confidential Computing Summit is the ideal event to:

Meet prospects, customers and practitioners

The best place to meet and interact with people and organizations evaluating and using confidential computing and confidential AI solutions.

See the latest innovation, best practices and solutions

A forum to learn about today's solutions, future advancements, use cases, and hear from experts.

Meet experts

The place to meet and network with Confidential Computing, Confidential AI and Analytics, and Privacy-preserving Generative AI and LLM skilled practitioners, innovators, pioneers and business leaders.

Facilitate Discussions

Drive discussions with experts, organizations implementing key business cases, vendors, technology innovators, researchers, luminaries and key media.
