AUTOMOTIVE GRADE LINUX

AGL Showcase at CES 2022: Call for Exhibitors

Automotive Grade Linux (AGL) is a collaborative open source project that is accelerating the development and adoption of a fully open software platform for automotive applications.

AGL Showcase 2022

As an official exhibitor at CES 2022 in Las Vegas, AGL's booth is locked in the Las Vegas Convention Center, West Hall, Booth #4029. The booth will be open to the public from January 5 - 8, 2022. In order to maximize exposure for our members and the broader AGL ecosystem, we would like to invite companies interested in demonstrating an application built on top of the AGL Unified Code Base (UCB) Software Distribution or a hardware solution running core AGL applications to apply for one of our limited demo spaces.

Benefits

> Business development and networking opportunities with the automotive OEM and Tier 1 ecosystem and increased exposure for your products and services.
> Increased exposure to automotive and technology media and major publications.
> Ability to schedule demos or book meetings in the AGL Showcase.
> Inclusion in the AGL CES press release and promotion via AGL social channels.
> Company branding in the AGL Showcase.
