What is Spinnaker Summit?

Spinnaker Summit brings together a thriving global community of software collaborators. Spinnaker, an open source, multi-cloud continuous delivery platform, has released hundreds of thousands of changes into production at Netflix and many other industry-leading companies like Adobe, Cisco, Grubhub, The Home Depot, JPMorgan Chase, Salesforce, Sony PlayStation, and Target. At the 2020 Spinnaker Summit, we will take action, building together to solve real problems our enterprises face.

Attendees will learn, advise, celebrate, and contribute in a collaborative, hands-on experience. The 2020 Spinnaker Summit will feature sessions from three different tracks: Getting Started, Technical Leadership, and Earn Your Stripes.

Through a month-long series of talks, interactive sessions, and hands-on contributions, we will explore the problem space, identify challenges and solutions, build skills, and share wisdom. Together, we will imagine a community roadmap, evolve Spinnaker governance, and create the future.

What is Spinnaker?

Spinnaker is an open source, multi-cloud continuous delivery platform for releasing software changes with high velocity and confidence. Created at Netflix, it has been battle-tested in production by hundreds of teams over millions of deployments. It combines a powerful and flexible pipeline management system with integrations to the major cloud providers.
