Open System Firmware Projects
Panel Discussion

—

*Three industry groups are pursuing the goal of creating **open system firmware**.*

They seek to improve the openness, portability, security, and maintainability of boot firmware, device firmware, and system management firmware.

*A panel of **passionate trailblazers** will describe their efforts, and the groups and organizations supporting them, followed by a Q&A session.*

27 Aug 2018
Linux Security Summit
Vancouver, BC, Canada
