The Cloud Native Computing Foundation’s flagship conference gathers leading technologists from leading open source and cloud native communities to further the education and advancement of cloud native computing.

Kubernetes and other cloud native technologies enable higher velocity software development at a lower cost than traditional infrastructure. Cloud native – orchestrating containers as part of a microservices architecture – is a departure from traditional application design. The Cloud Native Computing Foundation is helping to build a map through this new terrain, and KubeCon + CloudNativeCon is where the community comes together to share their expertise on this formerly uncharted but increasingly popular territory.

KubeCon + CloudNativeCon Europe 2020
Amsterdam, The Netherlands
August 13 - 16, 2020
6,000+ attendees

KubeCon + CloudNativeCon North America 2020
Boston, USA
November 17 - 20, 2020
12,000+ attendees

We believe in the value of face-to-face events and are looking forward to bringing our community together. However, we are also aware that due to the unprecedented impact of the COVID-19 global pandemic, that might not be possible. Our ability to hold events in person is contingent on being advised that it is safe to do so by the World Health Organization, Centers for Disease Control, and local authorities. If we determine that it is not safe or advisable to hold events in-person, we will pivot to virtual events on the same dates, with the same speakers and sessions, using an online platform that allows for interaction between all event participants, including attendee-to-speaker in keynotes and sessions, attendee-to-attendee in a virtual hallway track, and attendee-to-sponsor in a virtual sponsor showcase.

Who Attends?
Developers, architects and technical leaders, CIOs, CTOs, press and analysts from around the world gather at KubeCon + CloudNativeCon.

Benefits of Sponsorship:
• Engage with the industry's top developers, end users and vendors – including the world's largest public cloud and enterprise software companies as well as hundreds of innovative startups
• Inform the cloud native community about your organization's products and services
• Take advantage of a professionally-organized conference run by a neutral nonprofit where content is curated by the community
• Meet with developers and operations experts ranging from startup CTOs to corporate developers to senior technology executives from all over the world
• Associate your brand with one of the fastest growing technology communities
• Support and engage with the ecosystem behind many of the most popular open source projects
• Discuss strategic partnerships with leaders from other companies
• Join CNCF's hosted projects – Kubernetes, Prometheus, Envoy, CoreDNS, containerd, Fluentd, Jaeger, Vitess, TUF, OpenTracing, gRPC, CNI, Notary, NATS, Linkerd, Helm, Rook, Harbor, etcd, Open Policy Agent, CRI-O, TiKV, CloudEvents, and Falco – and help bring cloud native project communities together

Experts will discuss real-world implementations of gRPC, best practices for developers, and topic expert deep dives. This is a must-attend event for those using gRPC in their applications today as well as those considering gRPC for their enterprise microservices.

There will be ample time for meeting project leads, networking with peers, and Q&A.
