After almost two years of virtual-only events, we were ecstatic to return to in-person events, with our first hybrid Open Source Summit + Embedded Linux Conference. Joined by the first OSPOCon as well, the events gathered 1,944 total attendees - with 482 of those attending in person in Seattle - from 760 organizations across 68 countries around the globe.

While a smaller number of attendees joined than originally planned for (given the COVID Delta variant, closed borders, and growing virtual event fatigue) we still felt that the event was enormously successful, delivering timely and applicable content, opportunities to connect with community members globally, and unique and fun experiences to both virtual and in-person attendees, and giving our in-person attendees the ability to finally once again meet face to face, for important discussions, problem solving, and collaboration.

A huge thank you to all of our sponsors for joining us in opening the doors to in-person events, and the enormous value they bring to the open source community, once again.

The event attracted a diversified mix of open source community members from across the ecosystem, not a surprise given the range of topics offered to attendees. 55% of attendees were in technical positions.

“OPEN SOURCE SUMMIT REMAINS ONE OF THE IMPORTANT GLOBAL CONFERENCES OF THE LINUX AND OPEN SOURCE ECOSYSTEMS.”
Attendee Survey Results:

98% of respondents found the conference content and sessions to be informative and useful

96% of respondents would recommend attending the event to a friend or colleague

95% of respondents felt that participating in the event was a valuable use of their time

89% of respondents made valuable connections/were able to build relationships at the event

89% of respondents felt they had the right amount of time for networking/collaboration

88% of respondents said they are likely to join the event in-person in the future

67% of respondents attended the event virtually and 33% attended in-person

When asked which of the 3 ‘events’ they primarily attended for, 54% of respondents said Open Source Summit, 37% said Embedded Linux Conference and 9% said OSPOCon.
Content

Featuring 296 talks including keynotes, tutorials, breakout sessions, BoFs, and lightning talks, Open Source Summit + Embedded Linux Conference + OSPOCon delivered exceptional content across 18 topical tracks including 101 Essentials (Embedded, Cloud and Linux), AI/ML/DL, Cloud Infrastructure, Community Leadership, Diversity & Inclusion, Embedded Linux, IoT, Linux Systems, Open Source Databases and more.

This year’s Program Committee included 69 community members with a range of expertise. Together, they reviewed 737 submissions from our CFP, and ultimately accepted 275 talks - a 37.3% acceptance rate.

15 keynotes, 3 mini-summits, and 110 of the conference sessions were delivered by speakers in person in Seattle and were simultaneously streamed on the virtual event platform. The remaining sessions were all streamed live during the event, and remain available to view on the virtual event platform through the end of October, where attendees can view them along with visiting the sponsor showcase, participating in the chat rooms and enjoying the event virtual experiences. All sessions will be added to the Linux Foundation YouTube channel at that point and will be freely available for anyone to view on demand.

Most popular topics according to attendee survey results (in order of interest):

1. Linux Systems
2. Open Source Program Office Management
3. Cloud Native
4. Community Management & Leadership
5. Cloud Infrastructure & Diversity/Inclusion (tied)
Sponsor Showcase

The event hosted both an in-person and virtual sponsor showcase with 33 of our sponsors hosting in-person exhibit booths, and 39 hosting virtual booths.

Average in-person badge scans: 43
Total in-person badge scans: 1,190
Average virtual booth visits: 34
Total virtual booth visits: 1,303

Mariam Guizani @mariam_gui · Sep 30
These organic conversations and great interactions is where it's at! What an incredible community to be part of! Thank you @linuxfoundation for bringing all these amazing people together in person! Bye Seattle for now! #ossummit #ospocon @SlimDevOps
Online Networking & Virtual Platform

86% of respondents rated the quality of the virtual event component as “Good” or “Excellent”

83% of respondents felt the virtual event platform was easy to understand, access, and navigate through

79% of all attendees participated in the virtual experience

78% of respondents indicated they were able to network and collaborate effectively during the event via the Slack Workspace
The OSS + ELC + OSPOCon Slack Workspace once again served as a networking platform during the event, and was the virtual “Hallway Track” where attendees could collaborate, network, and have fun. It was also where speakers could join virtual attendees to engage in Q&A after sessions. Channels included track-specific topics such as #2-track-diversity-inclusion, #2-track-internet-of-things, #2-track-cloud-infrastructure etc. There were also specific channels for all things networking and fun such as #3-ntwk-newtoos, #4-fun-pets, #4-fun-share-your-workspace, and each sponsor had their own channel to network on and hold further discussions.

Top 5 Channels:

- #2-track-internet-of-things
- #2-track-ospocon
- #2-track-linux-systems
- #1-random
- #2-track-embedded-linux

Total messages sent: 8,333
As our first hybrid event ever, we have a lot of lessons learned and takeaways from the event to ensure an even better virtual attendee experience in the future. Some of the feedback we received on what we can improve upon - which we plan to implement - include: Virtual sessions streamed in rooms for onsite attendees; Moderators to handle virtual attendee Q&A for in-person speakers; and a new virtual platform (ideally not proprietary) that allows for more small group video interaction.

“ATTENDING THIS EVENT WAS A GREAT WAY TO SEE THAT FANTASTIC IMPROVEMENTS ARE HAPPENING IN OUR INDUSTRY.”
-MARTIN LAFRANCE

“OPEN SOURCE SUMMIT IS A FUNDAMENTAL GATHERING PLACE FOR EXCHANGING IDEAS ACROSS PROJECTS AND MEETING ALL OF THE PEOPLE WHO MAKE OPEN SOURCE COMMUNITIES WORK.”
-MATTHEW MILLER
Event Experiences

Beyond enriching educational content, the event offered a plethora of activities designed to connect and strengthen our community and attendees’ experiences, including these events/activities:

- Newcomer Orientation & Social, which attracted 27 first-time attendees
- Diversity Social, which welcomed 18 underrepresented minorities in tech
- Women in Open Source Lunch, which connected over 72 women and non-binary attendees
- 519 attendees participated in the virtual Red Hat Arcade
- 20 attendees participated in the 5K Fun Run in Seattle
- Onsite Sponsor Showcase Booth Crawl
- Evening reception at the Seattle Aquarium
- Online and onsite photo booths

**“Highly recommended for students like myself who want to explore [the] open source world in the right way! Loads of networking and amazing organisations to interact with!”**

---

**“The importance of diversity and inclusion were evident in words and practice. Well done!”**
Diversity

• **37%** of Keynote Speakers were women and **21%** were people of color.

• **33%** of Program Committee members identified as women or non-binary, and **26%** as people of color.

• **30%** of all conference speakers identified as women or non-binary, an increase from 23% in 2020.

• An estimated **31%** of conference speakers were people of color. This number was an estimated 32.9% in 2020.

• **23%*** of attendees identified as women and non-binary, an increase from 17% in 2020.

• **15%*** of registered attendees identified as a person of color. In 2020, this number was 16%.

*These are optional questions on our registration form that also include 'prefer not to answer' as an option, or can be skipped entirely, thus these numbers may be higher than reflected here.

---

**Gender**
- Male 65%
- Female 22%
- Prefer not to answer 12%
- Non-binary 1%

**Identifies as a person of color**
- No 67%
- Prefer not to answer 18%
- Yes 15%

**Age**
- 20-39 45%
- 40-60 37%
- Prefer not to answer 14%
- 61+ 3%
- 0-19 1%
Community Support

To encourage and increase the participation of a diverse community, The Linux Foundation offered diversity and need-based registration scholarships and travel funding for the event this year, providing $55,571 in funding for:

- 57 Diversity Scholarships
- 46 Need-Based Registration Scholarships
- Awarded 23 Diversity Travel Scholarships
- Awarded 7 Need-Based Travel Scholarships

Health & Safety

The health and safety of all conference attendees was a critical focus and of utmost importance to us, as we watched the pandemic closely all year and worked to put many measures and new protocols in place. To keep everyone at the event safe, all were required to provide proof of vaccination via the Clear app and their ID, wear a mask throughout the event, and take a daily health symptom survey in order to participate.

Onsite, specific measures, including increased social distancing, interaction wristbands, designated dining areas, plentiful sanitation stations, and more were introduced in order to ensure that all attendees felt comfortable during the event.
Social Media Highlights

Twitter

Impressions were driven by promotional content, including informational post series such as: “Why Attend” and “Explore the Track”, and promotion of individual sessions, speakers, sponsors, and live tweeting.

During our event date range, we saw 67M impressions for #ossummit, 48.3M for #lfelc, and 4.2M for #ospocon. We also tagged most event posts with #opensource as well, resulting in 48.7M impressions.

From Sept 4 - October 4, 2021, The Linux Foundation’s LinkedIn page increased by **4.1K followers** for a total of **172.3K**. Posts made to our page have garnered **468K impressions** (a 28% increase from 2020’s event period impressions).

Media & Analyst Results

Important tech and open source reporters joined both in-person and virtually from outlets including: CBS Interactive/ZDNet, EnterpriseAI.news, IBL News, LWN.net, SiliconANGLE Media, TFIR Media, The New Stack, The Register, and more.

Though the in-person audience this year was small, those that attended in person were very excited to be together again. It was truly amazing to witness the community joining together, in person for the first time in 1.5+ years. As you can tell from many of the posts below, the hallway track at the event was vibrant, and the power of open source collaboration could be witnessed first hand.

“IT WAS GREAT TO RECONNECT WITH PEOPLE, INCLUDING PEOPLE I HAD NOT EVEN REALIZED I HAD LOST TOUCH WITH UNTIL I BUMPED INTO THEM AT THE CONFERENCE. THE LF DID A GREAT JOB CREATING A SAFE ENVIRONMENT FOR ATTENDEES TO COLLABORATE EFFECTIVELY YET SAFELY. IT WAS GREAT. THANK YOU!”
What Attendees Are Saying:

**Daniele Berkozol**

*@tobenkozol*

Farewell #ossummit! So great to reconnect with everyone! I haven’t seen in a couple of years. Until we meet again!

---

**Marina Golani**

*@marina_golani*

These organic conversations and great interactions is where it’s at! What an incredible community to be part of! Thank you @lfnetwork for bringing all these amazing people together in person! Bye Seattle for now! #ossummit ProsQcon @BlogDevOps

---

**Yusuke Sato**

*Yusuke Sato*

It was great to meet people from all over the world at #ossummit and speak to them about a disinformation problem on #jwop.
