## COVID-19 & 2022 Events:

This event is being planned as a 'hybrid event' - an in person event with a virtual component for those that cannot attend in person. Given the fluid COVID-19 situation, this may change, and we may need to once again pivot hybrid events to virtual ones.

In the cases where this happens:

- We will make the decision and notify all participants at least 3 months in advance.
- Sponsors will, at that time, be presented with the new virtual event sponsorship pricing and benefits, and will have 14 days to choose whether to transfer their sponsorship to the virtual format, or receive a full refund.
- For any event that takes place in person, we will take all necessary precautions to ensure the safety of those in attendance.

## The Linux Plumbers Conference (LPC) is a developer conference for the open source community.

LPC brings together the top developers working on the “plumbing” of Linux — kernel subsystems, core libraries, windowing systems, etc. — and gives them three days to work together on core design problems. The conference is divided into several working sessions focusing on different “plumbing” topics, as well as a general paper track.

LPC launched in 2008 at the behest of the community and continues to provide a space where developers working in subsystems can come together to solve problems real-time. 500 developers gather annually for this event; the conference is limited to this number of people for maximum collaboration opportunities.

### Benefits of Sponsorship:

Recruit and acquire top talent
