cdCon+GitOpsCon is designed to foster collaboration, discussion, and knowledge sharing by bringing communities, vendors, and end users to meet, discuss, collaborate and start shaping the future of GitOps and CD together. GitOps is a practice that enables organizations to take a declarative approach to cloud native infrastructure and application delivery using CD best practices.

This event is aimed at audiences that are new or already using GitOps and CD. Get connected and learn from practitioners about pitfalls to avoid, hurdles to jump, and how to adopt most popular open source GitOps and CD Technologies such as Argo, Flux, Jenkins, Spinnaker, Tekton, and CDEvents in your cloud native environment.

Topics include getting started with GitOps, scaling and managing GitOps, lessons learned from production deployments, CD best practices, advanced delivery techniques, CD in action, supply chain security technical sessions, and thought leadership.
