# About LF Energy Summit

5-6 September 2024 | Brussels, Belgium

The world is facing immense challenges to achieve decarbonization targets and prevent the worst impacts of climate change. The only way to meet these targets is to work collaboratively to develop digital technologies and standards to optimize physical infrastructure, orchestrate supply and demand, and rapidly onboard clean energy resources. LF Energy accelerates the energy transition by building communities to develop open technologies and standards. LF Energy Summit will gather the LF Energy community including electric utilities, technology vendors, global energy companies, researchers, and other industry stakeholders to learn about LF Energy and its projects, collaborate, and share best practices.
